

MONTANA

EMPLOYMENT AND LABOR FORCE TRENDS

Research & Analysis Bureau ■ Department of Labor & Industry ■ 1st Quarter 2001 ■ Vol. 31, No. 1

Job projections for Montana's occupations, 1998-2008

It is estimated there will be about 205,000 wage and salary and self-employment jobs opening up in Montana from 1998 through 2008. About 82,000 of those jobs will be generated by industry growth in the state. The remaining jobs will be replacement jobs filled by employers after workers leave existing jobs for various reasons. Montana workers can expect to see about 21,000 full- and part-time jobs opening up each year from a combination of industry growth and worker replacement.

Job projections to 2008 for Montana's industries and occupations were developed by the Montana Department of Labor and Industry's Research and Analysis Bureau based on data through 1998. More detailed information can be found on the bureau's website at <http://rad.dli.state.mt.us/> and in a publication titled *Job Projections for Montana's Industries and Occupations, 1998-2008*, available on request.

Occupations projected to increase from industry growth

Occupations projected to show the largest job increases because of industry growth are salespersons, retail; first-line supervisors and managers/supervisors, sales and related workers; cashiers; general office clerks; carpenters; child care workers; truck drivers, heavy or tractor-trailer; general managers and top executives; registered nurses; truck drivers, light, including delivery and route workers; nursing aides, orderlies and attendants; and waiters and waitresses.

About 240 jobs are projected to open up each year through 2008 for registered nurses in Montana.

Occupations projected to show decline due to industry decline and changing technology

The two occupations projected to show the largest job declines due to declining industries and changing technology are farmworkers, farm and ranch animals; and farmworkers, food and fiber crops.

Occupations increasing due to both growth AND replacements provide largest number of jobs

Usually openings resulting from replacement needs are greater than those from industry growth—and more jobs will generally be available in large occupations that experience a need to replace workers rather than in occupations experiencing actual growth in demand.

Sales Representatives, Except Retail & Scientific & Related Products & Services	156
Maintenance Repairers, General Utility	152
Hairdressers, Hairstylists & Cosmetologists	151

Source: Research & Analysis Bureau, Montana Department of Labor & Industry

The table on this page shows annual job opening projections based on growth AND replacements. Growth is the increase in demand for workers in specific occupations—and replacements arise from the need to replace workers leaving the labor force (e.g., due to death, retirement, going home to care for children or a sick relative, taking a job in another state, etc.).

In Montana, occupations projected to generate over 300 job openings annually from growth AND replacements are salespersons, retail; cashiers; waiters and waitresses; combined food preparation and service

workers; general office clerks; carpenters; first-line supervisors and managers/supervisors, sales and related workers; and farmers/ranchers: self-employed. (The farmers/ranchers: self-employed occupation continues to generate large numbers of jobs each year through replacements, even though it is projected to lose about 17 jobs a year due to industry decline.)

Look for more detailed projections information at <http://rad.dli.state.mt.us/> and in a publication titled *Job Projections for Montana's Industries and Occupations, 1998-2008*, available on request. ■

Economic highlights and employment outlook

Montana's Civilian Labor Force averaged 470,900 the first quarter of 2001—down 4,200 over the quarter, and down 3,100 over the year.

Employment

The number of Montanans employed during the quarter averaged 444,800—8,300 fewer than the previous quarter, and about 100 fewer than the first quarter of 2000.

Quarterly Employment Trends

Quarter	Montana Civilian Labor Force*	MONTANA		Unemployment Rate (Montana)	UNITED STATES Unemployment Rate (U.S.)
		Montanans Employed	Montanans Unemployed		
2001 - 1st	470,900	444,800	26,100	5.5%	4.6%
2000 - 4th	475,100	453,100	22,000	4.6%	3.7%
2000 - 3rd	485,800	465,500	20,300	4.2%	4.0%
2000 - 2nd	481,600	458,800	22,700	4.7%	3.9%
2000 - 1st	474,000	444,900	29,000	6.1%	4.4%

*Rounded Civilian Labor Force Numbers, 2001 Benchmark (Not Seasonally Adjusted)

Unemployment

The number of Montanans unemployed during the quarter averaged 26,100—4,100 more than the previous quarter, but 2,900 fewer over the year.

The average unemployment rate for the quarter was 5.5 percent—up 0.9 percent over the previous quarter, but down 0.6 percent over the year. ■

Wage and salary jobs by industry sectors

(NOTE: Numbers may not total due to rounding.)

Total nonagricultural wage and salary employment in Montana averaged 384,500 jobs for first quarter 2001—down 9,700 jobs over the quarter, but up 8,000 jobs over the year.

Montana Employment and Labor Force Trends is published quarterly by the Research and Analysis Bureau, Job Service Division, Montana Department of Labor and Industry.

Mining Jobs in Montana

Thousands of Jobs (2000 CES Benchmark)

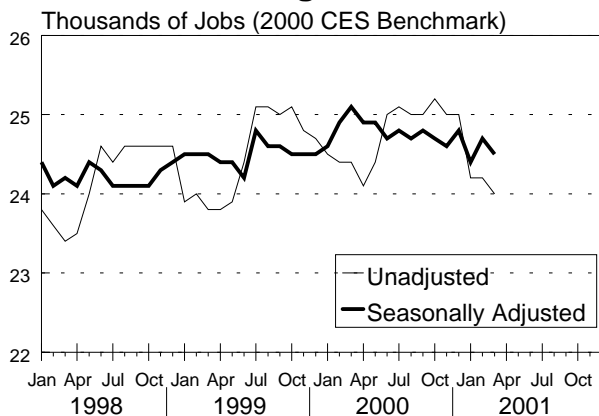

MINING averaged 5,000 jobs—down about 200 jobs over the quarter, but up about 400 jobs over the year, primarily in metal mining (other than gold or silver), and oil & gas extraction.

Construction Jobs in Montana

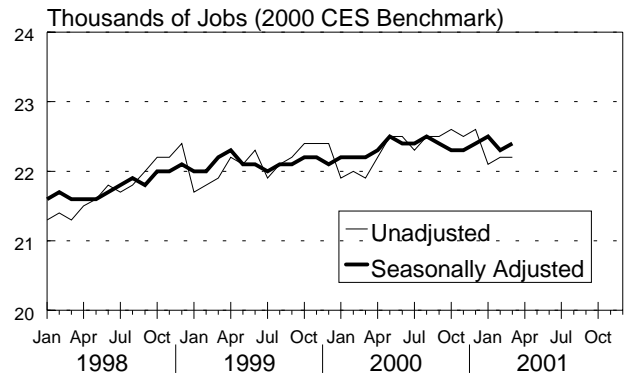

CONSTRUCTION averaged 17,200 jobs—down seasonally about 3,000 jobs over the quarter, but up about 400 jobs over the year. Over the quarter, **special trade** was down 1,400, **heavy construction** was down 1,100, and **general building contractors** was down 500. Over the year, general building contractors and heavy construction essentially held even, and special trade was up 300 jobs.

Manufacturing Jobs in Montana

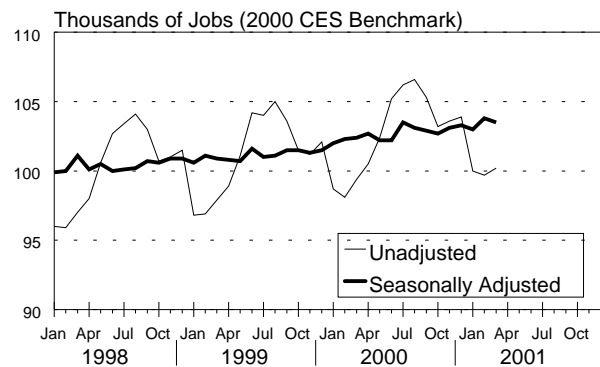

MANUFACTURING averaged 24,100 jobs—down about 1,000 jobs over the quarter, and down about 300 jobs over the year. Most of the over-the-year drop was in **lumber & wood products**.

Transportation-Communications-Utilities Jobs in Montana

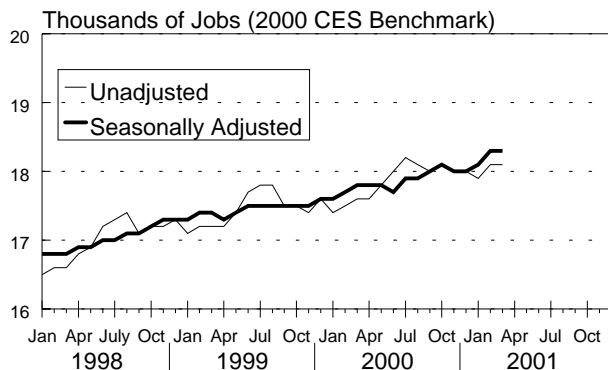

TRANSPORTATION, COMMUNICATIONS & UTILITIES (TCU) averaged 22,200 jobs—down about 400 over the quarter, but up about 300 over the year. Over the year, **local & interurban transportation** was up slightly and **combination electric & gas utility** was down slightly.

Trade Jobs in Montana

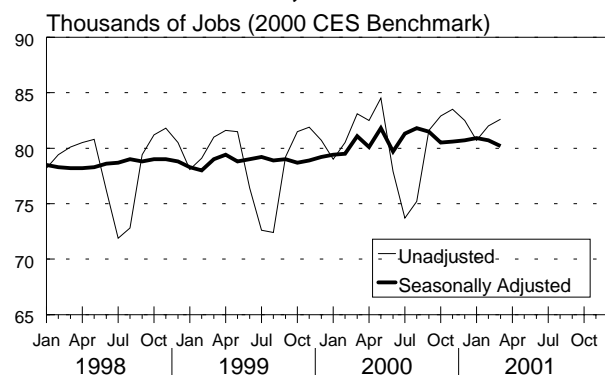

TRADE jobs averaged 100,000 jobs—down about 3,600 jobs over the quarter, but up about 1,300 jobs over the year. Over the quarter, **eating and drinking places** was down about 900 jobs and **department stores** was down 800. Over the year, **department stores** was up about 600 jobs and **eating & drinking places** was up about 500 jobs.

Finance, Insurance & Real Estate Jobs in Montana

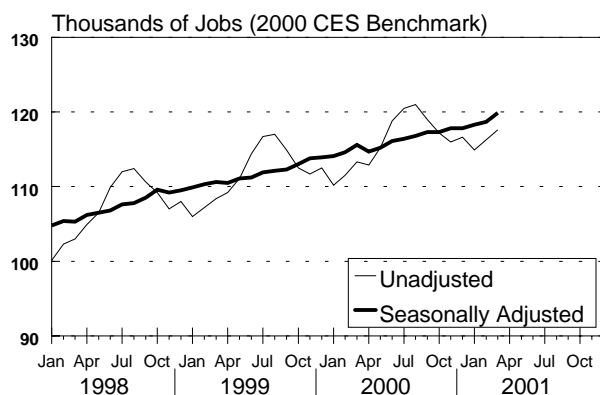

FINANCE, INSURANCE & REAL ESTATE (FIRE) averaged 18,000 jobs for the quarter—staying the same over the quarter, and up about 500 jobs over the year, primarily in **finance** and **insurance**.

Government Jobs in Montana Federal/State/Local, incl. Public Education

TOTAL GOVERNMENT averaged 81,800 jobs—down about 1,200 jobs over the quarter, and up about 900 jobs over the year. Over the year, **other state government** was up about 600 workers primarily due to the state legislative session and the transfer of county road maintenance from local to state government.

Services Jobs in Montana

SERVICES averaged 116,300 jobs—down about 300 jobs over the quarter, but up about 4,600 over the year. The largest over-the-year increases came in **business services**, **social services** and **engineering & management services**.

Average weekly hours and earnings

Average weekly earnings for production workers averaged \$379.20 for first quarter 2001—down \$1.69 over the quarter, but up \$8.09 over the year.

Average weekly hours averaged 31.6—down 3-tenths of an hour over the quarter, and down 2-tenths of an hour over the year.

Average hourly earnings averaged \$12.00 for the quarter—up 6 cents over the quarter, and up 33 cents over the year. ■

Industry news from around the state

(Gathered primarily from state newspaper reports)

Agriculture

⇒ **Members of two central Montana farm cooperatives** have voted to merge with Minneapolis-based Cenex-Harvest States. The 700 members of Winifred Farmer's Oil Cooperative and Central Montana Cooperative will become part of a new regional division of Cenex-Harvest States.

Mining

⇒ **Stillwater Mining Co.** has moved its corporate headquarters from Denver to Columbus. About 1,300 of the company's employees work at Stillwater's platinum and palladium mines near Columbus and Big Timber. Denver staff will join 150 company employees currently working in administrative and refinery jobs in Columbus.

Construction

⇒ **A \$400 million expansion** announced by Big Sky Resort over the next 12 years will involve building six high-speed ski lifts, expanding conference facilities, and adding shops, restaurants and a European-style spa.

⇒ **Big Mountain Ski and Summer Resort** has announced plans for a \$200-300 million expansion of its Glacier Village campus over the next decade to include a hotel, conference center, condominiums and townhouses, more employee housing and new commercial space. Construction is scheduled to begin this summer.

⇒ **A 48-room hotel** under construction near Glacier National Park on the Blackfoot Indian Reservation is scheduled to open in June. The Great Bear Lodge has a conference hall that will accommodate up to 150 people.

Manufacturing

⇒ **The Asarco smelter** in East Helena has closed, putting over 200 workers out of work. The plant's manager says the "indefinite suspension" of operation is the result of poor market prices for silver, lead and gold. He says laid-off workers would be wise to look for other jobs because of uncertainty over the smelter's future.

⇒ **Jore Corp.** has reduced its workforce because of financial losses in 2000 and a consequent drop in the company's stock price. The Ronan-based firm manufactures quick-change power tool accessories, hand tools and drill bits. Its president says the company is looking for ways to enhance shareholder value.

⇒ **Smurfit-Stone Container Corp.** has laid off more workers at its Frenchtown container-board mill because of high electricity costs and a slowdown in product demand.

⇒ **Louisiana-Pacific Corp., Plum Creek Timber Co., Stimson Lumber, Owens and Hurst Lumber Co. and Thompson River Lumber** have all cut back production at their mills in Montana. A private-public financial package designed to keep Pyramid Mountain Lumber open in Seeley Lake is in the works.

⇒ **Loggers are busy** in western Montana harvesting nearly 21 million board feet of timber burned during last summer's forest fires. State foresters are requiring loggers leave two ponderosa pine snags standing per acre as habitat for fire-dependent species. They are also asking loggers to arrange slash and sub-merchantable trees perpendicular to slopes to cut down on soil erosion.

⇒ **Five Anderson Steel Co.** employees purchased the company after it closed in Butte. Now called Continental Steelworks, the company makes fabricated structural steel products and above-ground storage tanks. It also provides painting and duct-work services.

Transportation, Communications & Utilities

⇒ **Qwest** is converting its Credit Management Center in Helena to a Customer Service Center. The 80 employees involved will receive the same base pay plus the opportunity to make sales commissions.

⇒ **Pending regulatory approval**, **Qwest** plans to sell 10 rural phone exchanges to Connecticut-based Citizens Communications. The exchanges are based in West Glacier, East Glacier, St. Mary/Babb, Cut Bank, Shelby, Conrad, Cooke City, Colstrip, Forsyth and Fairview. Citizens Communications already operates in Lincoln County.

⇒ **Touch America** has announced plans for a customer support service call center in Missoula that will employ 80-100 workers. The telecommunications subsidiary of Montana Power Co. previously contracted with out-of-state companies for those services.

⇒ **United Airlines** will begin offering nonstop, round-trip flight service between Missoula and Denver beginning in June. Three-times daily flights will be operated by Sky West Airlines. Nonstop service between Bozeman and Denver began last summer.

⇒ **Cenex Harvest States and Missoula Electric Cooperative** have formed a propane company called Energy Partners, LLC. to serve Cenex customers. It will be jointly owned by the two cooperatives and headquartered in the Missoula Electric Cooperative building.

⇒ **NASA** has cancelled its X-33 space shuttle development program for technical and financial reasons. Some future test flights from Edwards Air Force Base in California were to have landed at Malmstrom Air Force Base in Great Falls.

Finance, Insurance & Real Estate

⇒ **Glacier Bancorp Inc.** has announced the sale of six branch locations to Stockman Bank of Montana. The branches were acquired when Glacier Bancorp bought WesterFed Financial. Three of the branches are located in Great Falls. The others are located in Conrad, Havre and Cut Bank. The sale must be approved by federal banking regulators.

Trade

⇒ **The Supervalu Inc.** warehouse distribution center in Great Falls will close in June. Almost 60 employees are affected. The grocery distribution center was purchased from Ryan's Inc. in 1979. A spokesperson blamed decreases in volume and customer base. Supervalu Inc.'s other Great Falls' business, Ryan's Cash and Carry, will remain open.

⇒ **Stage Stores, Inc.** is closing its remaining stores in Montana located in Lewistown, Glendive and Hardin due to corporate downsizing tied to its Chapter 11 bankruptcy proceedings. A spokesperson says the national department store chain is also closing its stores in Wyoming and Colorado.

⇒ **Northwest Pipe Fittings Inc.** is building a distribution warehouse in Kalispell anticipated to open this summer. The wholesaler already has locations in Great Falls, Butte and Billings. It carries plumbing, heating and construction supplies.

⇒ **Quarter Moon Books** has opened in the former Freddy's Feed and Read location next to the University of Montana campus in Missoula. Espresso and bakery items will be sold along with new and used books.

Services

⇒ **Cendant Corp.** is closing its Great Falls call center in late May, affecting about 200 workers in what a spokesperson terms a consolidation of call center services. Great Falls employees of the New York-based company provided support for travel memberships, travel, and emergency roadside assistance services.

⇒ **Stream International** says it will hire another 150 workers at its Kalispell call center, bringing total employment to about 1,000. The Massachusetts-based firm provides customer service and technical support to computer- and Internet-related companies.

⇒ **Streaming Solutions** has laid off most of its employees in Butte and moved to a smaller office. The company produces full-screen broadcast quality video for the Internet and was brought to Butte from Cut Bank last summer by the Butte Local Development Corp. The company's founder says the company had to cut jobs when investors began shying away from dot.com companies. He says the company is working to stay solvent by concentrating on more marketable products and services and by selling its bandwidth.

⇒ **Mycotech Corp.**, a Butte company that develops biological pest control products, has merged with Lansing, Mich.-based Auxein Corp. The merged companies will be called Emerald BioAgriculture Corp. and will develop, manufacture and market natural crop protection and yield enhancement products. Eleven Emerald Bio employees will continue to work in Butte. Twenty-two employees will work in Lansing.

⇒ **A global consulting firm** is establishing an office in Helena. Tata Consultancy Services will help state government develop electronic commerce and information delivery strategies and also work with private sector customers in Montana, Wyoming and parts of Idaho.

⇒ **RightNow Technologies, Inc.** has laid off some of its sales and product support employees at its Bozeman and Dallas, Texas offices. The company's CEO attributes the layoffs to a slowdown in the economy and a change in the company's sales strategy.

⇒ **Missoula employees** of a Minneapolis-based Web-hosting company found themselves suddenly out of work in April. The 11 software developers for Dantis Inc. were poised to move into new office space and host an open house celebration. Instead they fell victim to fallout from the slump in dot.com stock prices. Two of the group are already at work on new ideas that they hope will bring work to some of the other laid-off workers.

⇒ **A Missoula-based company** that was recently purchased by Korean software firm, Medidas, has changed its name from HealthDirectory.com to Invizeon. It specializes in software that allows doctors to computerize patients' medical files.

⇒ **Montana manufacturing firm Semitool Inc.** has sold its SEMY Engineering subsidiary to Massachusetts-based Brooks Automation. SEMY Engineering was acquired by Semitool in 1996 and provides advanced control software systems to semiconductor manufacturers.

⇒ **S&K Technologies in Pablo** has obtained a contract with the Air Force to convert hardcopy technical manuals into electronic format.

⇒ **St. Luke Community Healthcare Network** in Ronan is building a physicians' clinic in Polson to be called Mission Mountain Medicine Polson Clinic.

⇒ **Rosebud Health Care Clinic** has affiliated itself with Deaconess Billings Clinic and changed its name to Forsyth Clinic.

⇒ **St. Vincent Healthcare** in Billings has acquired the Sheridan Family Care clinic in Sheridan, Wyo.

Government

⇒ **Hundreds of new firefighters** are being hired and trained in Montana this spring as part of a national fire plan established in response to last year's forest fires. In addition, fire facilities are being built, including a new air tanker base in Helena. ■

Information used in the preceding industry briefs was gathered primarily from state newspaper reports.

THE CONSUMER PRICE INDEX (CPI) IS A MEASURE OF THE AVERAGE CHANGE IN THE PRICES PAID BY URBAN CONSUMERS FOR A FIXED MARKET BASKET OF GOODS AND SERVICES. THE CPI IS CALCULATED MONTHLY FOR TWO POPULATION GROUPS, ONE CONSISTING ONLY OF THE URBAN HOUSEHOLDS WHOSE PRIMARY SOURCE OF INCOME IS DERIVED FROM THE EMPLOYMENT OF WAGE EARNERS AND CLERICAL WORKERS (CPI-W). AS NEW USES WERE DEVELOPED FOR THE CPI IN RECENT YEARS, THE NEED FOR A BROADER AND MORE REPRESENTATIVE INDEX BECAME APPARENT. THE ALL-URBAN CONSUMER INDEX (CPI-U), INTRODUCED IN 1978, IS REPRESENTATIVE OF THE 1982-84 BUYING HABITS OF ABOUT 80% OF THE NONINSTITUTIONAL POPULATION, COMPARED WITH 32% REPRESENTED IN CPI-W.

SOURCE FOR DATA: SEE TECHNICAL NOTE S-6 ON "SOURCES OF DATA" PAGE AT BACK OF THIS PUBLICATION.

Note: The Bureau of Labor Statistics has begun using a new formula for calculating the basic components of the CPI-U and the CPI-W effective with the data starting January 1999.

Reliability of CES Estimates

The relatively large size of the Current Employment Statistics (CES) sample assures a high degree of accuracy. As with all sample-based estimates, however, differences between the CES may be caused by sampling error, changes in industry classification of businesses, or openings and closings of businesses. Thus, the CES estimates are adjusted each year during the benchmark process (see explanation below).

The following table presents the amount and percent revision of Nonagricultural Wage and Salary All Employees estimate at the most recent benchmark for major industry divisions.

**Benchmark Evaluation of All Employees for Major Industry Divisions
In Montana (Employment in Thousands)**

Industry	Final Estimate	Bench- mark	Amount Revised	Percent Revised	Sample Units	Sample Employment	Sample % of

Women Workers, Production Workers, and Hours and Earnings estimates are not subject to benchmark revisions at the estimating cell level because there is no universe count available. These categories are sample based. The broader groupings may be affected by changes in employment weights as the cells are aggregated during benchmarking.

Benchmarking

Data included in this publication reflect the current benchmarks for the **Nonagricultural Wage and Salary Employment** series and the **Labor Force** series. The annual tables at the back of this publication also reflect these benchmarks.

A benchmark is a point of reference from which measurement can be made, or upon which adjustments are based. The 2 series mentioned above are estimated differently:

(1) The level of **nonagricultural wage and salary** employment is based on an estimate of the month-to-month change in an established level of employment. A sample survey of firms of different sizes within each industrial classification is used to measure the amount of change.

The benchmark is a reasonably complete count of the number of all employees in an industry at a specific point in time, and sets the level of employment from which the month-to-month change is measured. The base of the benchmark is the ES 202, which is a complete count of all employees covered by Montana unemployment insurance laws. The ES 202 is adjusted by special surveys to include employees not covered by unemployment insurance laws.

Nonagricultural wage and salary employment estimates are compared to the ES 202 on an annual basis and adjusted accordingly (benchmarked) for estimation errors that may have occurred due to sample error, changes in industrial classification of individual firms, the presence of noncovered employees and the opening or closing of businesses.

(2) **Labor force** data is derived from a monthly sample of households conducted by the Bureau of Census for the U.S. Department of Labor. Known as the Current Population Survey (CPS), this data is designed to be statistically significant on a monthly basis for the nation. States with small populations, however, do not have a large enough sample to ensure reliability on a monthly basis. This is the main reason for benchmarking the labor force series in Montana.

The labor force series also includes the benchmarked nonagricultural wage and salary employment by industry in its benchmarking process. Revisions to the labor force series is normally limited to the preceding 3 years. Occasionally, a longer benchmark is warranted. For instance, the 1990-95 labor force series was revised in 1997 to incorporate Census data revisions.

If a more detailed explanation of the benchmarking process is needed, please feel free to contact the Research and Analysis Bureau.

Glossary of terms

1. Civilian Labor Force - the number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.
2. Employed - those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who, although not working, had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.
3. Unemployed - those persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).
4. Unemployment Rate - the number of unemployed expressed as a percent of the civilian labor force.
5. Residence Data - a count of people by where people live.
6. Establishment Data - a count of jobs by where people work.
7. Seasonally Adjusted Labor Force Series - to facilitate the evaluation of the labor force, recurrent yearly movements have been isolated and removed using the X-11 ARIMA method of seasonal adjustment. This is the same method used by the Bureau of Labor Statistics to seasonally adjust the national labor force series.
8. MSA - Metropolitan Statistical Area - as determined by the Office of Management and Budget. The MSA must have a central city with a population of 50,000 or more.
9. LFA - Labor Force Area as determined by the Research and Analysis Bureau, Montana Department of Labor and Industry, consists of a central city or cities with a population of less than 50,000 and the economically integrated geographical area surrounding it.
10. LWIA - The enactment of the Workforce Investment Act (WIA) of 1998 is the first wholesale reform of the nation's job training system in more than 15 years. Montana's State Workforce Investment Board was created by the Governor in response to this Act and its first task was to certify the local workforce investment areas (LWIA), which are guided by local workforce investment boards (these local boards replaced JTPA's Private Industry Councils). The 2 LWIAs for Montana are known as Rural Concentrated Employment Program, or CEP (Beaverhead, Broadwater, Deer Lodge, Granite, Jefferson, Lewis & Clark, Madison, Meagher, Powell, and Silver Bow counties), and Balance of State (the other 46 counties).
11. BENCHMARKING - It is a continuous process of establishing a new set of data which affects the series of estimates through revisions. Once a new benchmark is established, the adjustments to estimates between the new benchmark and the preceding one are carried forward progressively to the current month by use of sample trends. The benchmark is established less frequently (usually once a year) based on sample or secondary data. In the case of employment data, the benchmark is used to establish the level of employment, while the sample is primarily used to measure the month - to - month changes in the level.
12. CES-790 Program - current employment statistics survey produces monthly estimates of a wide variety of employment and earnings information for the nation and each state. Because this information comes from a survey of employers, persons who work for 2 different companies would be counted twice. Thus, nonagricultural employment is actually a count of the number of jobs filled, rather than the number of persons employed.

Sources of data

S-1.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics (BLS). LAUS data (Local Area Unemployment Statistics program) is adjusted to the Current Population Survey benchmark and is the official BLS approved series that is used to allocate federal funds and determine eligibility for federal assistance programs. This series represents employment and unemployment by place of residence, and is not comparable to the place-of-work industry employment series (CES data). LAUS data is calculated for the week that includes the 12th of the month. Workers involved in labor disputes are counted as employed. Total employment in the labor force also includes agricultural workers, unpaid family workers, domestic workers and the self-employed.

S-2.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau. The unadjusted unemployment rate is prepared by the LAUS program in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. The seasonally adjusted rate is an unofficial series, and is provided only for use as a state economic indicator.

S-3.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from LAUS data. Data for Service Delivery Areas and Labor Force Areas is calculated from the official data series by summing up employment and unemployment for the appropriate counties involved, and calculating an unemployment rate from the summed data for each area.

S-4.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. Data from the CES (Current Employment Statistics) program represents nonagricultural wage and salary employment by place of work, and covers full-time and part-time employees who worked during, or received pay for, the payroll period that includes the 12th of the month. The data excludes the self-employed, volunteers, unpaid family workers and domestic workers. Persons on sick leave, vacations, or holidays (and being paid for that period by their employer) are considered employed. Payroll and worker hour data is collected for production and related workers in manufacturing industries, nonsupervisory workers in private service-producing industries, and construction workers in construction industries. The earnings figures are "gross" figures—that is, they reflect changes in wage rates, shift differentials and premium pay for overtime work. The hours figures relate to the hours for which pay was received, which is different from scheduled or standard work hours.

S-5.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from a survey of Business Establishments as part of the BLS-790 Program. Information on women workers is computed as a ratio of all employees of the Current Employment Statistics, and is produced for informational purposes only.

S-6.) Tabulations produced by the U.S. Department of Labor's Bureau of Labor Statistics, and reprinted by the Montana Department of Labor and Industry's Research and Analysis Bureau for informational purposes only. This is a national data series because Montana data is not computed separately.

1,000 copies of this public document were published at an estimated cost of \$3.42 per copy, for a total cost of \$3,420.00, which includes \$2,210.00 for printing and \$1,210.00 for distribution.
